---	-------	--------------	------

---

The backup must have a 6 1/4" hole through the head to use the 4 1/2" OD to 5 9/16" OD and the 5" OD to 6 1/16" OD Jaw equipment. The 147-19 housing adaptor is used on the other size equipment to reduce the hole from 6-1/4" OD to 5" OD.

The Sizes listed are actual OD of tubing, upset or collar the jaws will catch.

One set of jaws are included in the price of the backup.
